DAY ON WALL STREET

SPECULATIVE INTEREST CENTERED IN SUGAR.

THAT STOCK FIGURED FOR 149,000 OUT OF 268,000 SHARES SOLD.

The Movement in It Was Decidedly Erratic Reflecting Alternate Liquidation and Raiding and Covering of Shorts—The Closing Was Strong and at General Fractional Gains.

The Milwaukee money market continues moderately active, and general business is fair, as indicated by the bank clearings, which yesterday amounted to $715,089.66 and balances were $134,543.91, against $802,032.53 and $79,451.99 on the corresponding day in 1895 and $721,770.47 and $104,983.74 in 1894. The crop outlook in the Northwest is generally favorable, especially in the section tributary to Milwaukee, and merchants look for an expansion of trade in the coming fall months. The supply of money is large enough to meet all wants of legitimate business, and 7 per cent. continues the going rate of discount. The currency movement to the interior is light, and exceeded by the return flow.

New York exchange is higher, and quoted at 70c premium per $1,000 between Milwaukee banks. Counter rates are quoted at 1-10 discount buying and 1-10 premium selling for bankers' bills.

Foreign exchange and coins are firmer, and buying rates are quoted as follows:

	Sight.	Sixty days.
Sterling	487⅝	486⅝
Marks	95¼	94½
Francs	118⅝	118¼
Guilders	40 1-16	39⅞

The United States has purchased considerably less of Great Britain than last year, the value of British exports to our country in May, 1896, having been worth only £1,000,000, as against £1,557,000 in May, 1895.

Security prices are extremely high in London, though despatches estimate that purely speculative contracts for the rise have not been heavy, says The New York Post. The eagerness of real investment inquiry abroad may be judged, not only from the price of consols, which yield at current quotations less than 2½ per cent., exclusive of depreciating premium, nor even alone from the price of high-grade British railways, few of which net much more to the investor than 3 per cent. more noteworthy than all this is the rush of capital into miscellaneous offerings of securities. Week before last, no less than $44,589,90 of such issues largely bicycle shares and breweries—were offered to the public, the year's total issues up to date by far exceeding the record of the corresponding period in any year since 1890. It will be noticed, in the same connection, that deposits at the Bank of England have increased, since a year ago, $72,500,000, and the stock of bullion nearly $55,000,000, current returns of both being considerably more than double those of nine or ten years ago. What such comparisons prove most forcibly is that some very generally accepted reason still exists which prevents the permanent lodgment of foreign capital in our securities.

New York Money and Stocks.

New York, June 24.—Speculative interests today centered in Sugar, that stock figuring for over 149,000 shares out of a general total of 268,000. The movement in it was decidedly erratic, reflecting alternate liquidation and raiding and covering of shorts. Strength was displayed at the outset on covering of shorts, but as soon as this demand was satisfied, weakness developed which was accentuated by the activity of the traders and on large offerings, the price dropped 3¼ per cent. to 113½. At the extreme low point supporting orders were distributed and on buying for both accounts an improvement occurred to 115¾. The stock was feverish thereafter, reaching 113⅞, rallying to 115 and closing ¼ per cent. from yesterday. Brokers usually acting for the more prominent insiders were busy in the stock all day, buying and selling. The market opened slightly higher under the influence of advancing London prices. The improving tendency was brought to a speedy halt on account of the break in Sugar and declines were recorded, extending in Burlington to a point. The railway shares, in the main, however, received but slight attention during the early afternoon, although they were sympathetically depressed with Sugar. In the final hour, covering all along the line was noted on an extensive scale, under while the list rallied sharply from the low point. In this movement the grangers, Chicago Gas, General Electric and Louisville & Nashville signaled for a point or thereabouts. The coalers also made notable gains. The strength of this group was due to the formal advance in anthracite coal prices. The market closed strong in tone at general fractional gains on the day.

The Evening Post's London financial cablegram says: "The settlement to-day revealed a small account, but Contangoes were higher as usual, at the end of the half year, on account of money being temporarily wanted. Thus, contangoes on Americans were 2½@3 per cent. The stock market opened dull, but as soon as the arrangement of the account was seen, the tone changed sharply and prices rebounded. Argentine securities were in strong demand and Americans after a period of dullness were very firm in the street. The prices at the closing being one-half to three-quarters of a dollar better for leading stocks. Copper stocks were better, also mines. The Paris and Berlin markets were better and closed firm."

Money on call closed firmer at 1½@2 per cent., last loan 1½, closed 1¾@2. Prime mercantile paper 4@5½ per cent. Sterling exchange easier, with actual business in bankers' bills at 4.86@4.86¼ for demand and 4.87@4.87¼ for 60 days. Posted rates 4.88@4.88½ and 4.89@4.89½. Commercial bills 4.86⅞. Bar silver 68⅞. Silver certificates 69⅝@69⅞. Clearings $82,035,483; balances $4,579,832.

Cotton.

New York, June 24.—The unexpected steadiness of Liverpool this morning despite American weakness yesterday, contributed in a slight advance early, but further rains in Texas, with reports of 1.88 inches fall at Longview, soon started free local selling and prices yielded, lazily declining 6 to 8 points during the afternoon. Additional reports of showers in Eastern Texas created a still weaker feeling in the afternoon, inducing liquidation among room traders. Reports from the eastern portion of the cotton belt have been somewhat less satisfactory owing to insect injury and lack of sunshine. The close was barely steady at the lowest of the day, 7 to 10 points net loss.

Oil.

Oil City, Pa., June 24.—Credit balances 116; certificates offered at the close at 113½, no bids throughout the day session. Shipments 82,332; runs 103,167.

ON THE CHICAGO BOARD

EXTREME NARROWNESS IN TRADING IN WHEAT.

THE MARKET WAS DULL, WEAK AND LOWER.

Nothing but the General Disinclination of the Trade Appeared to Be Against the Market—Disappointing Results of Threshing Reported—Corn Was Heavy—Provisions Firmer.

Chicago, Ill., June 24.—The most striking feature of the day's trading in wheat was its extreme narrowness. Dull markets are usually weak, and to-day's was not an exception. September wheat closed at a decline of ¼@⅜c. Corn and oats were both very heavy and declined at about ¼c each. Provisions improved a trifle, pork making 10c gain.

Wheat price changes were confined within the narrow range of ½c and slow at that. Although the most bearish feature of yesterday's news was considerably modified to-day, wheat opened at a decline of ¼c. The receipts at Minneapolis and Duluth were 820, yesterday, and to-day only 321 cars; besides that, however, spring wheat and winter wheat regions alike had another heavy soaking rain, which both could well have done without. The cables showed no particular change to begin with, and nothing but the general disinclination of the trade appeared to be against the market. The latter feature of the business was even more pronounced, to-day, than was remarked of it yesterday. Reports from the Northwest had no more to say of rust in the growing spring wheat, but letters from various sections of the winter wheat country generally mentioned the disappointing results of threshing. The St. Louis market on the other hand, was quoted easier for spot wheat and one of the soft spots in the market was caused by the latter report. Nothing, however, that occurred could move the price for Sept. wheat more than ¼c on either side of 57½c which was virtually the price it started at. Sept. opened ⅛@¼c lower at 57½@⅝c, declined to 57⅜ and advanced to 57¾c the weakness in Wall street was strongly felt in the pit during the final hour and with free selling and lack of support September sold off to 57¼c but reacted in the last five minutes on some covering by shorts to 57⅜@½c, and closed easy at those figures.

Corn was very heavy. A fair line of short corn was covered, but the continued favorable prospects of another big crop added to the decline in wheat made the downward path easy even while the covering was going on. September opened a shade lower at 28⅞c and gradually declined to 28¾c, closing weak at that.

Oats quite a fair business was transacted but the feeling was very weak and another low price was recorded; July touching 16c. September opened a shade higher at 17@17⅛c and declined to 16⅝@16¾c, where it closed.

Provisions were firmer but not very active. Hog receipts showed a big falling off which created a firm opening. Good sport was given by packers and the prices advanced steadily though some reaction followed later September pork closed 10c higher at 7.30; September lard 2½c higher at 4.22½; September ribs unchanged at 3.90.

Estimates for Thursday: Wheat, 17 cars; corn, 400; oats, 290; hogs, 29,000 head.

MILWAUKEE MARKETS.

Breadstuffs—Wheat and Flour.

The breadstuffs markets yesterday were steadier, and wheat fluctuated at the range of Tuesday's prices. The movement in the West was smaller, with fair exports. The weather continues fair, but crop reports from the Northwest are not at all favorable.

The following table shows the opening, highest, lowest and closing quotations of No 2 spring wheat in Milwaukee yesterday:

	Opening.	Highest.	Lowest.	Closing.
Cash or seller July	56⅝	56¾	56¼	56½
Seller September	57⅜	57½	57	57¼

Car receipts of grain in Milwaukee during the twenty-four hours ending at 7 o'clock yesterday morning—46 cars wheat, 8 corn, 50 oats, 7 barley and 2 rye; total 113 cars. On track at Minneapolis and Duluth—371 cars wheat, against 609 the corresponding day last week, 195 in 1895 and 251 in 1894.

The tone of public cables was less favorable, and English markets declined 4d per cental for future wheat, while spot was steady. English country markets were quiet and steady, but French firm. The weather in France was warm. Paris was higher for wheat, but lower for flour.

M. W. Yerxa of Minneapolis telegraphed Sheppard that the spring wheat crop is in bad shape, and the stand very heavy and completely matted. The weather is unfavorable and wheat is lodging and rusting badly, and a heavy rain or windstorm would flatten it to the ground.

A report from Wykoff, Minn., June 23, to E. P. Bacon & Co., says: Our crop will not be as large as last season's, and fully two weeks earlier. Our barley crop is 10 per cent. less, wheat about 5 per cent. more and oats 5 per cent. less and not as heavy.

Receipts of flour and wheat at ports included 117,000 bush wheat, 286,000 bush corn, 143,000 bush oats and 10,612 bbls flour.

The New York Journal of Commerce says that over 1,600,000 bush grain has been shipped from New York to South Africa since June 1.

Receipts at Willis and Port Arthur last week were 234,516 bush; shipments, 276,925 bush; in store, 1,825,000 bush. Since opening of navigation the shipments have been as follows: To New York, 1,963,398 bush; Montreal, 838,473 bush; Ontario, 1,433,474 bush; total, 4,235,245 bush.

Kansas City dispatches say the severe rainstorms of the past three days will delay harvesting operations and damage the wheat considerably. Letters to Young, Morton & Co. from Kansas, Nebraska and Missouri, report the wheat crop very heavy, especially in the spring crops and pastures; however, the wheat is flowering, which is the case in many districts, it is to be hoped that the weather may now become fair and dry; no complaints of appreciable damage to the wheat by these storms are yet spoken of in the French papers. But the continued heavy rains of yesterday were creating some uneasiness. The reports from all other countries generally are very encoura
